

# **Care & maintenance**

## Guide

## Leather

FK 87 Grashopper, FK 82 X-Chair, FK 6720 Easy Chair/Sofa, JK 710 Skater Chair, HB 6915 Daybed

Lange Production use high quality aniline leather in all our furniture. The aniline leather is a full grain vegetable tanned leather. The leather's natural structure makes it very comfortable to sit in and gain a beautiful patina over time. Since the aniline leather is a natural material, marks can occur such as: Insect bites, scars, neck wrinkles, birth marks, hair whirls.

The best maintenance of the leather is to regular vacuum clean with a soft brush - avoid sharp objects and avoid any cleaning products. We recommend that you do not to place your leather furniture in direct sunlight or near extreme heat.

## Textiles

JK 710 Skater Chair, JK 810 Chair

To prolong the lifespan of upholstered furniture it is important to clean and maintain regularly. We recommend you to vacuum your upholstered furniture weekly to remove any dust.

### Stain removal:

If you get a wet stain on your upholstered furniture, dap immediately a hand warm wrung cloth on to the stain - do not rub! Rubbing can damage the fabric and can cause loss of color. Leave to dry before use. Often you can remove dried stains by vacuuming the upholstery.

## Solid wood & oil treated wood

Wing Table serie

Wood is a natural and living material. Color variations of the same wood type can occur, due to the wood's natural lines and knots.

Be aware not to place your solid wood furniture near heating sources to prevent the wood from drying out. Direct sunlight can mature the wood - it is important not to place items on a new piece of wood furniture before oil treated if placed in direct sunlight as it will leave a mark.

To ensure a long lifespan and a beautiful patina of your wood product it is important to do correct and regular maintenance. For everyday cleaning, wipe the wood with a hand warm wrung cloth and finish off by wiping dry with a dry clean cloth - do not use any cleaning products.

If the wood have any scratches, give it a light and gentle sanding using a sanding sponge or very fine sanding paper. It is important only to sand in the direction of the grains. After sanding, remove the dust with a clean and dry cloth.

Maintain your wood furniture with a frequent oil treatment, as it will penetrate into the grain and create a water repellent surface and give it a smooth finish. You do it by applying a thin and even layer of oil in the direction of the grain and finish off by removing the excess oil with a clean dry cloth. Allow the oil to dry for approx 24 hours before use, by a weeks time the surface will be fully hardened.

## Lacquered wood

FK 100 Sideboard, FK 150 Sideboard, GJ Bow Chair

The lacquered surface on natural wood and veneer will take on a patina and darken within the first weeks of use.

If you place your lacquered furniture in direct sunlight it is important not to place items on top of your furniture in the first weeks, as it can cause discoloring on the surface.

Remove stains by wiping the furniture with a hand warm wrung cloth and finish off by wiping with a dry clean cloth until completely dry, to avoid stripes. We recommend not to use any chemicals on the lacquered surfaces as it can damage the lacquer. Do not use steel wool sponge only soft cloths.

## Colored lacquer

JK 810 Chair

The colored lacquer seals the surface, which makes it very easy to maintain.

To remove stains wipe the furniture with a hand warm wrung cloth and finish off by wiping with a dry cloth until surface is completely dry, to avoid stripes on the lacquer. We recommend not to use any chemicals on the lacquered surfaces, as it can damage the color. Do not use steel wool sponge only soft cloths.

## Laminate

HB 128 Bar Cart

Laminate is very easy to maintain in good condition. Wipe frequently with a clean hand warm wrung cloth to remove dirt and dust, polish with a dry fluffy free cloth. Remember to remove wet stains, if you leave to dry this can cause limescale marks.

## Chrome-plated steel & powder-coated steel

FK 87 Grasshopper, FK 82 X-Chair, FK 6720 Easy Chair/Sofa, JK 710 Skater Chair, HB 6915 Daybed, HB 128 Bar Cart, FK 89 Coffée Table, FK 90 Coffée Table, FK 91 Coffée Table, FK 100 Sideboard, FK 150 Sideboard

Chrome-plating gives your metal objects a smooth silky surface, you will need some regular maintenance to keep this clean and shiny.

To clean the chrome-plated steel use a clean soft hand warm wrung cloth and dry immediately with a clean soft cloth to avoid water spots on the steel. Do not use any steel wool sponge only. We recommend not to use any chemicals on the chrome-plate and powder-coated steel as this can damage the surface.

## Glass

FK 89 Coffée Table, FK 90 Coffée Table, FK 91 Coffée Table

Glass requires every day wiping with a clean fluffy free cloth to keep it dirt and dust free. Use hand warm water and wipe the glass, dry immediately with a clean fluffy free cloth to polish. It is important to wipe off any liquids immediately to avoid limescale marks. In case that you need to remove any grease use recommended glass cleaners. Do not use any chemicals that can damage the glass.

## Marble

FK 89 Coffée Table, FK 90 Coffée Table, FK 91 Coffée Table

Lange Production only use the delicate white/grey marble from Carrara, known for their high quality.

To maintain the silky mat look and to improve the marble's stain resistance, we recommend to regularly treat your marble with soap flakes. Whisk 2-3 tablespoons of soap flakes in 1 litre of boiled water, whisk until all the flakes are dissolved then only use the foam. Apply the foam with a soft cloth all over the marble, and leave for a few minutes, wipe off the excess foam and dry with a dry soft cloth.

## Carpet

JK VarioLine

We recommend treating everyday stains and spillages by mopping up the area and using a solution of soft soap in warm water if required. If you experience a serious spillage we recommend you to contact carpet cleaning professionals.

New rugs can shed a bit of fluff, which is created from excess fibres that were not properly incorporated into the yarn during spinning. This is normal, and is not a sign that your rug is falling apart! It is best to vacuum a rug often at first - after some time the fluffing will lessen and eventually cease.
