Fabricius & Kastholm

1965

The designers

The two Danish designers Preben Juhl Fabricius (1931-1984) and Jørgen Kastholm (1931-2007) met each other at the School of Interior Design where they both studied in the 1950s.

But, it wasn't until they both had gained some experience abroad that they met again in 1960 and agreed upon the design philosophy of; Perfection, Aesthetics and Minimization.

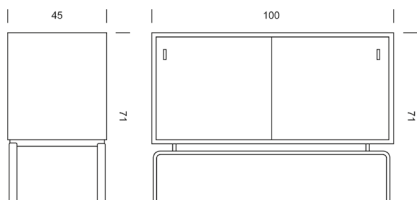

One year later, in 1961 they formed a partnership and founded an architect office. While Fabricius was an

educated cabinetmaker, it was with Kastholm's unique experience as a blacksmith that the obvious and usual choice of material would be steel.

Since 2006, Lange Production has had the exclusive rights to manufacture a variety of Fabricius & Kastholm's design collection. The furniture is produced at the original factory, and with the original tools as it was in the 1960s. The entire production has been carried out in close collaboration between Lange Production and Jørgen Kastholm, to preserve and respect the authenticity and high quality of these classic design.

Materials Cabinet of veneer. Frame in chrome-plated steel.

Surfaces Dark oak with dark oak doors.
Olive with white doors.
Santos Palisander with black doors.
